What is a smart TV Remote app?

One remote for all smart TVs and streaming devices, easy to set up, durable and no battery needed. More than a remote app, it also possesses multiple streaming function. The app uses device discovery technology to automatically detect and connect to compatible TVs on the same Wi-Fi network, easy to connect and taking less effort.

How does the Smart TV app work?

The app uses device discovery technology to automatically detect and connect to compatible TVs on the same Wi-Fi network, easy to connect and taking less effort. Swipe on the responsive touchpad, tap buttons or use your voice to perform actions such volume control, channel switching and menu navigation, efficient and intuitive.

To use LG Universal Remote your LG Smart TV and your mobile device must be on the same Wi-Fi Network, once the Smart TV is detected then you will have to Enter the PIN shown on TV to start using LG Smart TV Remote. Traditional IR Devices Supports all traditional LG TV's, your phone must have IR blaster in it for using the LG TV Remote Control .

With these apps, you can transform your smartphone into a universal remote control, allowing you to control everything from your TV to your lighting and more.

In this article, I am sharing some information on Credential Locker in UWP Apps. It's an API that is used to store and roam credentials securely (Windows.Security.Credentials). Since it is roamed across the devices, we don't have to ask users for credentials again on the other devices running the same app.
