

What can be placed in the front locker

Do you need a front or rear locker?

When deciding between a front or rear locker, people tend to use the rear locker more often due to the front's effect on turning. Using a front locker can put significant stress on the CVs when turning, and turning over uneven ground with a front locker can lead to broken CV joints.

How do I use my lockers?

Lockers are free for you to use during your visit. Press Start, enter a 4 digit pin then press lock. Do the same to open it. Note - lockers are emptied every evening, do not leave your belongings in overnight. Who can I ask if I'm not sure how to use equipment? Please ask our friendly gym staff, if you need assistance with a piece of equipment.

Why is a front locker necessary?

Many people find that turning with a front locker stresses the CVs greatly and can lead to CV joint breakage. Because of the difficulty turning and CV stress, those with front lockers often use them only on straight sections of the track.

Are plastic lockers a good choice?

40. Wetsuits - Plastic lockers will not rust, rot or corrode so are ideal for external storage. They can also be used in wet changing areas, are able to be washed down with a pressure washer and are suitable for storing damp items; such as towels and wetsuits.

Where the lockers are going and who can access them will help you with your decision in selecting cam, swivel, coin and other locks. For Schools, swivel locks are ideal as they instantly access with the turn of a small level on ...

I am planning adding an ARB locker to the rear of my sport with LSD, and add front in the future. I dont see the point of leaving the clutch based LSD and then adding a front locker. The LSD is good, it helps, but it is not a locker at all. I rather have open differentials up front and a rear locker than a front locker and a rear clutch LSD.

The gas locker in our PVC is massive so I put in stuff that isn't going to cause a spark and make sure it's secure so can't move around. On the base in front of the cylinders I have plastic grids (upside down shallow plastic baskets) to raise stuff about an inch above the bottom drop vents so any gas gathering down there isn't impeded at all ...
