For nuts and screws, I would wick the glue in on the assembled nut. For screws threaded into a threaded hole, I would wick some under the head of the screw before finally tightening. When I had to remove any of the screw/nut assemblies, I would tighten the nut to snap the screw and replace with new as I usually couldn't unscrew the nut.

Instant traction buttons. I installed front and rear lockers to my 80 Series Land Cruiser, and have been absolutely blown away by their performance. I know that when I get to a difficult situation, rather than using momentum to overcome the obstacle I can put one (or both) lockers on and drive through it in a much more controlled manner.
