Wind power has long had a strong foothold in many parts of the country. According to American Clean Power: "Wind power capacity totals nearly 140 GW, making it the fourth-largest source of electricity generation capacity in the country. This is enough wind power to serve the equivalent of 43 million American homes.

The positive impacts can be: 1) voltage support, 2) loss reduction, 3) transmission systems and distribution systems capacity release, and 4) improved utility system reliability [5].

When looking for a solar lead generation company, installers can choose from several approaches including, but not limited to: 1. Lead generation experts with specific knowledge of the solar market. 2. A generalist lead generation company. 3. A marketing agency. 4. Affiliate networks
