A bad solar panel installation might show itself through roof leaks that happen during storms, or ones that gradually increase over time without obvious signs. And remember, simply patching up the leak area isn't a long-term solution when the underlying cause is related to how the solar panels were installed.

Installation is the key to having a successful solar panel operating effectively. Before choosing the installers, make sure you research their service. Read the reviews, consult by word with the friends and neighbours and check if they have any complaints from the Better Business Bureau.

Besides, if done incorrectly, a bad solar panel installation can damage the roof and cause leaks. That does not mean that a homeowner with a tile roof should avoid solar energy. Clay roof tiles are strong enough to withstand wind and rain but can break easily (if you just step on them), which is a problem during the installation of solar panels.

Although adding a solar array to your roof has several benefits, it can also result in solar panel roof leaks. Despite best practices, solar panel installers are generally not roofers and they may unknowingly cause damage. Roofing professionals can stop existing leaks and prevent new ones from developing.

Frequently Asked Questions about How to Fix Roof Leak Under Solar Panels. Q: Can I fix a roof leak under solar panels myself? A: Yes, you can fix a roof leak under solar panels yourself by following the steps mentioned in this guide. However, if you're not comfortable with DIY repairs, it's best to hire a professional.

Another common cause of roof leaks after solar panel installation is damaged roof tiles. Solar panels are mounted on top of your roof, and over time, the weight of the panels can damage the tiles. This can cause the tiles to crack or break, which can then allow water to leak through.
