

Wind Power Venture Capital

At Capital Power, we contribute to the communities in which we operate with the aim of building a sustainable future for all. We engage our neighbours, consider their interests and build real relationships. We aim to source supplies and services locally for our operations, as well as hire from the community, when possible. At Whitla Wind:

Despite a contraction in the wind power market in more recent years, DH continued to invest in innovation resulting in turbine blades capable of generating 5% more power. In 2013, the company sold Svendborg Brakes to focus on the core business, positioning the firm for a resurgence in wind energy in 2014.

Enova Value II is a joint venture with Enova, a pioneering wind project developer in Germany. The ambition of the partnership is to acquire several hundred MW of operational wind projects with objective to carry out a repowering, i.e., to redevelop the site and eventually replace the existing project by a new one based on the latest technology.
